

*for utilities
and utility vendors*

UtilityAPI

Third-Party Management and Data Sharing Platform

DERs, ESCOs, and other third parties can easily meet utility data sharing requirements.

UtilityAPI offers a standards-compliant, ready-built Green Button Connect Data Custodian. This solution serves as a third-party data sharing platform, and includes technical support. UtilityAPI manages all third parties, no matter what their level of technical expertise.

Fulfill your data sharing requirements by incorporating our product into your existing data platforms or bids.

Complies with Green Button Connect Data Custodian (OpenESPI) standard

Hosted third-party interface

Offloads usage from utility core systems

Embeddable in utility/vendor interface

Adaptable to any Meter Data Management back-end

Third-party technical support

Well-documented third-party API

Data exports that meet third-party specs

Secure, isolated, and auditable

About UtilityAPI

UtilityAPI provides quick and secure access to energy usage data. Hundreds of third parties nationwide already use our services, including the leading names in solar, battery storage, and energy management.

Leading the Industry

Regulators and utilities trust UtilityAPI's technical expertise. Utilities adopting new data exchange protocols come to us for testing environments. We also sit on the board of the Green Button Alliance.

Protecting Privacy

We protect privacy and data. We do not send, store, or process customer data outside of the United States. We never sell customer data.

Serving Both Consumers and Providers

We have won two U.S. Department of Energy grants supporting our work with third parties and utilities. These awards reflect our commitment to serving both ends of the data exchange pipeline.
